

Turning Point for God Job Description – San Diego Headquarters

WEB & APP DEVELOPER

Turning Point for God is the radio and television ministry of Dr. David Jeremiah, senior pastor of Shadow Mountain Community Church. It is an international ministry with a vision to reach every language group in the world with the Gospel and the teachings of God's Word. From a modest beginning over thirty five years ago, Turning Point is now accessible by 2.5 billion people worldwide every day through radio, television, and the Internet.

Position Summary:

The Web & App Developer reports directly to the Senior Web Developer and works as an integral part of the Web Team in developing a Turning Point-branded, multi-platform streaming service that delivers both audio and video content worldwide. Responsible for coding and modifying applications, from layout to function and according to determined specifications. Strives to create visually appealing interfaces that feature user-friendly design and clear navigation. Specifications may be determined by Web Team or Creative Leadership based on goals of a particular project.

Essential Functions:

- Work with a team of developers to create engaging, consistent app and web user interfaces, integrating API data seamlessly.
- As necessary, work with the development team to create back-end processes, including automated scripts, media transcoding pipelines, and data aggregation.
- Integrate applications with other business processes per specifications and schedule.
- Develop/maintain applications and pages per specifications and schedule.
- Develop and perform complete unit-testing of websites and applications with Web Team.
- Keep source code well-maintained and documented at all times per department standards.
- Work with our media team and media-hosting provider(s) to incorporate various media assets into applications.
- Regular exposure to project stakeholders, as well as the authority and scope to apply your expertise to many interesting technical problems.
- Understanding of UI, cross-platform and browser compatibility, general app & web functions and standards.
- Actively participate in Internet-related strategic and tactical planning.

Other Duties:

- Please note this job description is not designed to cover or contain a comprehensive listing of activities, duties or responsibilities that are required of the employee for this job. Duties, responsibilities and activities may change at any time with or without notice.

Qualifications:

- 1 to 5 years of application development experience
- MUST have demonstrated proficiency in the following technologies:
 - Object-oriented programming
 - React Native or PHP (non-WordPress)
 - Experience with API integrations
 - JavaScript

- HTML, CSS
- Design, and deployment of relational databases (MS SQL Server preferred)
- Understanding of web UI, cross-browser compatibility, and iOS/Android design standards
- Demonstrated ability to work well within a small development team structure.

Education:

- Bachelor's Degree in Computer Science or Computer Information Systems

Other Requirements:

- Position requires constant communication with colleagues.
- Position is non-exempt, full time, remote.
- Must be a like-minded believer and share our passion to deliver the unchanging Word of God to an ever-changing world.
